## Claim Objections

Claims 5, 6, 7, 8, 21, 22, 23, 24, 26 and 27 are objected to because of the following informalities: The above claims are potentially confusing because they all contain "preferred" ranges, (limitations following the terms "preferably", "more preferably" or "most preferably") following a recited range. These terms render the claims potentially unclear because there is potential confusion as to what range should actually be covered by each claim. For examination purposes all ranges following the term "preferably" were treated as non-limiting preferred examples within the broader required range. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-28 and 30 are rejected under 35 U.S.C. 102(a) as being anticipated by WO'705. WO'705 teaches, in claims 13-16 particularly, a method of treating a metal surface which may be steel or aluminum (see claim 43 of WO'705 for example) coated with rubber (see page 1 for example) by applying a solution to the substrate, said solution comprising at least one organofunctional silane (vinytriacetoxysilane for example) (see page 3 for example) and a non-organofunctional silane (bis-(trimethoxysilylpropyl) amine for example) (see pages 4-6 for example) both at least partially hydrolysed, with a pH of about 4 and concentrations of 0.5-10% in an aqueous solution free of other acids, thereby showing all aspects of the above claims.
